

Winter 2007 - EcoLunch

Fridays 12 noon – 403 WI DB - Bring your lunch

- 19 January DEBATE: The future of biology is... molecular genetics (David “the Motherboard” **McClellan**) vs. natural history (Hal “the Motherwhit” **Black**)
- 26 January Eric **Billman** – Do fish get larger upstream: where to catch your next trophy fish
- 02 February Alicia **Toon** – Two magpies for good luck
- 09 February Dennis **Shiozawa** – Geology and biogeography of western North America
- 16 February Riley **Nelson** and Jack **Sites** – Rain, frogs, and stoneflies: french bread and French Guiana. Et voila, Marcel, Ça va?
- 23 February Scott **Peat** – Hexatyline: Insect parasitic nematodes in a plant parasitic nematode world
- 2 March Rachael **Remington** - Ecology and evolution of turbid adaptations in fishes
- 9 March Jared **Lee** – Phylogeography of the Central American fish *Poecilia gillii*
- 16 March Ed **Priddis** - Do western mosquitofish have an Achilles heel? Evolutionary tradeoffs and invasive species
- 23 March Matthew **Bekker** – BYU Department of Geography – Ribbon forest dynamics in Glacier National Park
- 30 March Arley **Camargo** - Reproductive allocation in *Physalaemus biligonigerus* and *P. gracilis* (Amphibia: Anura): a comparative allometric analysis
- 6 April Heather **Semon** (25 mins.) – Diversity of spring invertebrates in the West Desert of Utah and Eastern Nevada
John **Aedo** (25 mins.) – Form & function of Utah fishes: how differences in morphology affect swimming performance
- 13 April Laura **Scott** – Can fish count? Species recognition and character displacement in two Mexican *Poeciliopsis* fishes
