

# Winter 2008 - EcoLunch

Fridays 12 noon – 403 WI DB - Bring your lunch

- |             |   |
|-------------|---|
| 11 January  | Peter <b>Unmack</b> (job seminar practice talk) – What molecular phylogeography can tell us about management and conservation of fishes |
| 18 January  | Jack <b>Sites</b> – Species and speciation: some things to consider   |
| 25 January  | Dan <b>Mulcahy</b> – “Zogs! magoi” ... travels in Mongolia  |
| 01 February | Department of Biology faculty candidate - <i>TBA</i>  |
| 08 February | Department of Biology faculty candidate - <i>TBA</i>  |
| 15 February | Department of Biology faculty candidate - <i>TBA</i>  |
| 22 February | Department of Biology faculty candidate - <i>TBA</i>  |
| 29 February | Department of Biology faculty candidate - <i>TBA</i>  |
| 07 March    | Leigh <b>Johnson</b> – Plant speciation in our own backyard: even more things to consider   |
| 14 March    | Lauren <b>Chan</b> – <i>Aliciella</i> in wonderland: conservation genetics of a rare desert plant                                       |
| 21 March    | Byron <b>Adams</b> – Are the effects of climate, litter quality and time on decomposition rate dependent on fauna?                      |
| 28 March    | Fernanda <b>Werneck</b> – Biogeography and structure of lizard communities from seasonally dry tropical forests of South America        |
| 04 April    | Kit <b>Menlove</b> - Protein structure prediction and new approaches to model detection.  |
