

Winter 2009 – EcoLunch

Fridays 12 noon – 403 WI DB - Bring your lunch

- | | |
|-------------|--|
| 16 January | Mariana Morando – Phylogeography of Patagonian lizards: many lineages, few names, and some common histories |
| 23 January | Gabe Colbeck * – Washington State University – Phylogeography, song divergence, and reproductive isolation in two species of songbird |
| 30 January | Justin Bagley – Phylogenetic analyses of body size and shape variation in a diverse yet morphologically conservative clade of lungless salamanders (Plethodontidae: Desmognathus) |
| 06 February | Amy Breen * – University of Alaska, Fairbanks – Post-glacial migration and adaptation in balsam poplar |
| 13 February | Brian Barber * – American Museum of Natural History - |
| 13 February | Duane Jeffery – Darwin and the Human Fossil Record
Special Darwin Week Presentation – 3pm – 403 WI DB |
| 20 February | Eugenia Zarza * – University of Norwich, UK - Uncovering hidden biodiversity within a widespread species of Mexican Iguana |
| 27 February | Nikki Hanegan – Building a teaching portfolio: an effective way to improve teaching for graduate students and faculty |
| 06 March | Bishwo Adhikari – Animal life in extreme environments: from genes to ecology |
| 13 March | Duke Rogers – Field-based studies of Mexican rodents: phylogeny and disease |
| 20 March | Byron Adams – Limits and drivers of metazoan distributions in the Trans Antarctic Mountains |
| 27 March | Jeff Moore – The population structure of <i>Polycelis coronata</i> , a poor dispersing freshwater turbellarian |
| 03 April | Xioaben Jiang – Testing the patching recruitment hypothesis <i>Neothermoma alicia</i> |
